- 100% employee owned
- Based in Denver, Colorado
- Principals have average tenure of 20+ years
- Focus on providing high quality investments to clients
- \$15.5 billion in AUS¹ | \$10.5 billion in AUM

Cambiar Investors, LLC (Cambiar) is an independent registered investment adviser with the United States Securities and Exchange Commission. Cambiar claims compliance with the Global Investment Performance Standards (GIPS®).

Cambiar's International Equity ADR Composite includes discretionary, taxable and tax-exempt portfolios, including portfolios that are part of broker-sponsored programs that pay transaction costs, or wrap programs. The records of the portfolios in the composite are maintained on Cambiar's systems. The minimum asset level for the composite is \$100,000. Portfolios in the composite invest predominantly in foreign securities through American Depositary Receipts ("ADRs") and other securities which are traded on U.S. exchanges. Cambiar's International Equity ADR Composite primarily invests in stocks with a market capitalization greater than \$5 billion. The typical number of securities in the International Equity ADR portfolio is 40-50 holdings.

Returns are presented gross (g) and net (n) of management fees. Gross and net returns have been reduced by transaction expenses. Net returns are also reduced by actual investment advisory fees and other expenses that may be incurred in the management of the account. The gross returns reflect accounts with both gross and "pure" gross performance. "Pure" gross returns, applicable to separately managed accounts that are part of broker-sponsored or wrap programs that bundle fees including commissions (SMA), are not reduced by any expenses, which includes transaction costs, and are provided as supplemental information. Net returns for SMAs are calculated by subtracting actual SMA fees reported by the SMA sponsor. Net of fees performance reflects a blended fee schedule of all accounts within the International Equity ADR Composite. SMAs incur bundled fees that are charged by brokerage firms which sponsor SMA fee programs and that may include transaction costs, investment management, portfolio monitoring, consulting services, and in some cases, custodial service fees. Cambiar clients may incur actual fee rates that are greater or less than the rate reflected in this performance summary. Results are reported in U.S. dollars.

Performance results for the International Equity ADR Composite are evaluated against the MSCI EAFE Index. The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted, market capitalization weighted index that is designed to measure developed market equity performance, excluding the U.S. & Canada. The index assumes no management, custody, transaction or other expenses. The MSCI EAFE Index is a broadly based index that reflects the overall market performance and Cambiar's returns may not be correlated to the index. The index is unmanaged and one cannot invest directly in an index. Cambiar's performance and the performance of the MSCI EAFE Index include the reinvestment of all income. Benchmark returns are net of withholding taxes. Cambiar typically follows each custodian's treatment of tax withholding and therefore dividends may be presented as gross or net of dividend tax withholding depending on the custodian's treatment. Withholding taxes may vary according to the investor's domicile.

Data is provided for a representative account as of June 30, 2019. Portfolio holdings, characteristics, country breakdown, and sector weightings may change over time and may differ between clients based upon their investment objectives, financial situations and risk tolerances. Cambiar makes no warranty, either express or implied, that the weightings shown will be used to manage your account. The securities presented do not represent all securities recommended for advisory clients. The information provided on this page should not be considered a recommendation to purchase or sell any particular security. There can be no assurance that an investor will earn a profit or not lose money. The one year forecast is included for illustrative purposes and accordingly, no assumptions or comparisons should be made based upon these ratios. Active share is a holdings-based measure of active management representing the percentage of securities in a portfolio that differ from those in the benchmark index. The projected ratios, risk statistics, and country allocations are based upon third party sources that are deemed to be reliable; however, Cambiar does not guarantee its accuracy or completeness. Risk statistics are based off a five year time frame.

¹AUS (assets under supervision) includes UMA/model portfolios that are non-discretionary assets. AUS and AUM are preliminary.
